

Take part in a research study about families!

The "My Family" Study

We are looking for children with Autism Spectrum Disorder, ages 8-13, with married parents to participate. We are interested in learning more about how children think and feel when their parents have a disagreement.

What will we do?

- Visit one of our research labs in Dallas @ SMU or Fort Worth @ TCU
- You and your child will complete some surveys (in English) and your child will watch some videos.
- Earn up to \$50 for your time!

This project is being conducted by the Family Health & Development Lab at SMU in collaboration with the Families Autism and Child Emotion Studies Lab at TCU.

Contact us to learn more about participating!

Dallas Location (SMU)
